-- The MAILING DATE of this communication appears on the cover sheet with the corresponding address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Independent claims 1, 6, 12, 13, and 14 and dependent claims 2-5 and 7-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7, 20, 81 and 97 of the U.S. Patent No: 6,690,004.

Although the claims are not identical, they are not patentably distinct from each other and carry the same meaning.

4. The subject matter claimed in the instant application is disclosed in the U.S. patent cited above and both claim common subject matter: Field asymmetric ion mobility spectrometer apparatus, comprising a sample preparation and introduction section, including a head for delivery of ions from a sample, and an ion filtering section, an output part and an electronics part, the filter section comprising surfaces defining a flow path, further comprising ion filter electrodes facing each other over the flow path derived from said sample, the electronics part configured to apply controlling signals to

the electrodes, the electronics part applying a signal across the electrodes for generating a filter field having a condition for filtering the flow of the ions in the flow path according to said conditions, and the filter field being compensated to pass desired ion species out of the filter. Furthermore:

- a) Independent claim 1 and dependent claims 2-5 carry the same meaning as of the independent claim 1 and dependent claims 6-7 and 20 of the Patent.
- b) Independent claim 6 and dependent claims 7-11 carry the same meaning as independent claims 1 and 31 and dependent claims 2-6 of the Patent.
- c) Independent claim 12 carries the same meaning as independent claim 81, and
- d) Independent claims 13 and 14 carry the same meaning as independent claims 91 and 97 of the Patent.

Conclusion

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
